

## **REQUEST FOR PROPOSALS (RFP 07-01)**

(Questions & Answers posted on 1-11-07)

(Questions & Answers updated on 1-23-07, beginning with Item 4)

1. Is there any additional information on the RFP items? (Preliminary Studies, traffic volumes, safety, structure conditions, etc?)

Response: Additional information that was provided for the RFP is posted on the INDOT web page at <http://www.in.gov/dot/div/legal/rfp/RFP07-01AdditionalInfo.htm>

2. Will the score sheets from previous RFPs be available for review, prior to that contract being fully executed.

Response: No, the score sheets will become available only after a contract has been signed by all parties.

3. When will “unit price” Right-of-Way contracts be ready for the selected firms to sign?

Response: As soon as possible, after the selections have been posted on the web.

4. Is the Affirmation Action Certification required for all RFP items?

Response: The Affirmative Action Certification is only required if the DBE or WBE or MBE Goal is greater than 0%, for that particular RFP item.

5. Is the SR 58 bridge to be widened or simply replace on this project?

Response: For now, this structure will remain in place and will only require widening. However, there is a slight chance this structure could be a new structure if needed to allow for future added lanes on I-65. Per the Draft Engineer's Report, the direction given is to widen the existing SR 58 bridge over I-65 from 39 feet to 75 feet. This will also require the rehabilitation of the existing portion of this structure.

6. Concerning Item Number 18 the pre-qualification category 2.1 is required yet the work description does not reflect that any traffic data collection is needed. Is the pre-qualification category 2.1 correct?

Response: Prequalification category 2.1 (Traffic Data Collection) will not be required for this item.
